TestNav Installation Guidelines for Windows

Dallas ISD Technology Department: Client Solutions v2017.02.17

CAMPUS INSTRUCTIONS FOR TESTNAV INSTALLATION

TestNav Installation

Note: It is recommended that you use a "wired" Windows desktop or laptop if possible. Wireless desktops and laptops may be used. (It is possible that they may occasionally lose connectivity during the test. Students will be able to log back in and resume where they left off. Please work with your campus CTA to find the best locations for testing.)

Step 1: Double click on *DISD Software Center* on your desktop.

Step 2: Click Applications in DISD Software Center. Click on TestNav and then Install.

Step 4: Sign in with your testing credentials on *test day*. (These will be provided to all students by the testing coordinator at the campus on testing day.)

Note: Please contact your testing coordinator for any questions concerning the testing procedures.
