# Example Items <br> <br> Grade 5 Mathematics 

 <br> <br> Grade 5 Mathematics}

## Grade 5 Mathematics Example Items are a

representative set of items for the ACP. Teachers may use this set of items along with the test blueprint as guides to prepare students for the ACP. On the last page, the correct answer, content SE and SE justification are listed for each item.

The specific part of an SE that an Example Item measures is NOT necessarily the only part of the SE that is assessed on the ACP. None of these Example Items will appear on the ACP.

Teachers may provide feedback regarding Example Items.
(1) Download the Example Feedback Form and email it. The form is located on the homepage of the Assessment website: https://assessment.dallasisd.org.

OR
(2) To submit directly, click "Example Feedback - online form" after you click the Example Items link under ACP Resources on the ACP tab on the Assessment website.
