

All-In-Learning Scoring and Reporting Issue

There were several tests that were experiencing a system glitch in All In Learning with the reports feature of the program. This affected all assessments that contained rubric scores.

When viewing the students' scores in teacher view the display was correct. However, once a report is run to view all data, the student's score dropped by the value of the rubric score.

Below are the assessments that were affected:

- Grade 4 Revising and Editing (English and Spanish)
- Grade 7 Revising and Editing
- Grade 7 ESL Beginner Revising and Editing
- Grade 7 ESL Intermediate Revising and Editing
- English I
- English II

All In Learning corrected this issue and all data has been restored.
