*Schools must provide at least one calculator for every 5 students. Shared calculators must be cleared after each student use.

- All calculator memory must be cleared to factory settings prior to use on the ACP.
- Must disable functions: geometry functions; graphing implicit equations and inequalities; graphing inequalities
- Computer Algebra System (CAS) or smartphone application calculators are NOT permitted.
- For calculator applications, all Internet capabilities must be disabled on the device. In addition, the calculator application being used must be locked down.
