ACP Example Sets

✓ Assessment Department has developed Example sets to be representative of the corresponding ACP.

✓ Example sets are *only* available in DAN for student practice and for teachers to gain an understanding of the formats and rigor of ACP items. Teachers can use these sets of items, along with the test blueprint, as a guide for preparing students for the ACP.

✓ Example sets have technology-enhanced items *only* if the respective ACP also has technology-enhanced items. These TE items types on Examples are respective of the types on ACPs. Example sets will provide students with added exposure to the new item types. Technology-enhanced items will be on many, but not all, ACPs for the 2023-24 school year.

Example items represent, not give away, the items on the ACP. The number of Example items is a portion of the number of items on the actual test, and is representative of the format and rigor. Items appearing on the ACP are not limited to the format appearing in the Example sets. Example items are intended to provide an understanding of some, not all, possible approaches to assessing the given SE. The specific part of an SE that an Example item measures is not necessarily the only part of the SE assessed on the ACP. None of these Example items will appear on the ACP.

Assessment Department wants your feedback!
